

GOLD REACH RESOURCES LTD.
Management's Discussion and Analysis
For the Three Months Ended June 30, 2011

This Management's Discussion and Analysis ("MD&A") for Gold Reach Resources Ltd. (the "Company" or "Gold Reach") is dated September 23, 2011 and provides information on the Company's activities for the three months ended June 30, 2011 and to the date of this report. This discussion and analysis should be read in conjunction with the audited consolidated financial statements for the year ended March 31, 2011.

BUSINESS OF THE COMPANY

The Company was incorporated in November 1965 and is engaged in the exploration and development of mineral properties hosting copper-gold, gold silver and copper prospects located in north British Columbia. The Company continues to evaluate acquisition of additional mineral interests in Canada.

OVERALL PERFORMANCE

EXPLORATION

Auro Property

The Company has identified numerous magnetic and electromagnetic target areas on the Auro property from its 1,598 line kilometre airborne geophysical survey completed in the Spring of 2010. The survey identified large areas of highly resistive rocks that are coincidental with the magnetic anomalies. The largest of these anomalies is approximately 6 kilometres long and 2 kilometres wide. The geophysics indicates that the Auro Property is on the same structural corridor as Richfield's Blackwater project.

The newly completed detailed interpretation of the 1,598-line-kilometre airborne geophysical survey and the recent stream sampling program has identified numerous areas requiring follow up ground work.

In mid June 2010 the multi phase exploration program for the summer and fall months commenced with field crews starting work on additional stream and soil sampling. This sampling program was completed in early October 2010. The Company also completed 80 line kilometres of line cutting and a 3D induced polarization geophysics survey in preparation for future drill sites. Analysis of the 3,000 soil samples collected and the interpretation of the 3D induced polarization geophysics identified multiple drill targets. Drilling permits were received in June and shortly after a camp was established on the property and drilling commenced.

During June – July 2011 the Company completed an initial drill program of 3,009 metres on the Auro Property. A total of 11 holes were drilled and tested six target areas within a 5km by 5km area. All of the holes were drilled in an area of deep cover and were targeted based on induced polarization geophysical anomalies and indirect surface geochemical techniques.

Several holes encountered zones of alteration and anomalous mineralization. Hole Au-11-1 intersected 2.6 metres grading 0.1 g/t gold from 208 to 210.6 metres depth. Hole Au-11-5 intersected 3 metres grading 0.02% molybdenum from 328 to 331 metres depth and 3 metres grading 0.1% copper from 337 to 340 metres depth. Hole T5B-11 intersected 3 metres grading 0.1% copper from 131 to 134 metres depth, 3 metres grading 0.3% zinc from 137 to 140 metres depth, and 3 metres grading 0.14% copper and 23.4 g/t silver from 156 to 159 metres depth.

No large mineralized intervals were identified in this round of drilling, however, the alteration and elevated levels of gold, silver, copper, and zinc are encouraging. Most of the drill holes encountered a large coarsely crystalline intrusive body containing localized zones of quartz-sulfide veining associated with patchy zones of potassium feldspar or sericite alteration, pyrite, and minor chalcopyrite and molybdenite. This geologic environment is considered to be too close to the large intrusive body for Blackwater-

GOLD REACH RESOURCES LTD.
Management's Discussion and Analysis
For the Three Months Ended June 30, 2011

Davidson style mineralization, and the company will focus future exploration efforts at Auro looking at the zone farther outboard from the intrusive complex. To date less than 10% of the property has been systematically explored.

Seel and Ox Lake Properties

The Company presently has 19,105 hectares comprised of 53 claims in its Seel and Ox Lake project. To date, the Company has advanced its exploration programs on both the Seel and Ox Lake claims, including geological mapping, surface sampling, geophysics and diamond drilling on both claim blocks.

The Seel and Ox Lake claims are contiguous and are located 120 kilometres by road south of Houston, BC and eight kilometres southeast of the operating Huckleberry open pit mine. The Seel property covers a seven kilometre by two kilometre zone with coincident soil, rock and geophysical anomalies of a type commonly associated with large porphyry mineral systems. An extensive footprint of hydrothermal alteration and sulphide mineralization is observed throughout the seven kilometre belt.

In late 2009, the Company completed a 1,325 line kilometre helicopter borne geophysical survey consisting of magnetometer and radiometric data gathering on the Seel and Ox Lake claims. As a result of the data analysis, the Company acquired two new contiguous claims totaling 920 hectares. The Company continues to examine possible future exploration and development alternatives for the Seel and Ox Lake properties.

On November 16, 2010 the Company signed a Letter of Understanding (LOU) with the Cheslatta Carrier Nation ("Cheslatta") through its wholly owned subsidiary Ootsa Lake Resources Ltd. ("Ootsa").

The LOU between Ootsa and Cheslatta established a business relationship and understanding between the parties regarding the ongoing mineral exploration and development work on Ootsa's Ox and Seel properties. The parties have agreed to act in good faith in negotiating the basic terms of a formal joint venture arrangement for the future development of the Ox and Seel properties.

Ootsa owns a 100% ownership interest in the Ox and Seel properties, which total 19,105 hectares of land located eight kilometers from the producing copper-molybdenum Huckleberry Mine. Two separate resources have been identified from over 100 diamond drill holes on the Ox and Seel properties, resulting in NI43-101 tonnage estimates being compiled for each resource.

Cheslatta is a First Nation community located on the south side of Francois Lake near Burns Lake BC, and has Aboriginal rights and title over the area that the Ox and Seel properties are located.

MINERAL PROPERTIES

Seel/Ox Lake – British Columbia

The Company acquired the interests in the Seel/Ox Lake mineral exploration projects in British Columbia during 2003 through to the date of this report.

Seel copper/gold project

The Company owns a 100% interest in the Seel property subject to a 2% Net Smelter Return Royalty ("NSR").

GOLD REACH RESOURCES LTD.
Management's Discussion and Analysis
For the Three Months Ended June 30, 2011

Ox Lake copper/gold project

The Company owns a 100% interest in the Ox Lake property subject to a 2% NSR. The Company is entitled, at any time, to purchase a 1% portion of the NSR from Silver Standard Resources Inc. ("Silver") by the payment to Silver of \$500,000. The Company may purchase the remaining 1% NSR at any time by payment to Silver of an additional \$1,000,000.

Auro Property Claims – British Columbia

Auro Property – Central

On January 12, 2010, the Company acquired a 100% interest in 13 new mineral claims comprised of 5,801 hectares ("Auro Property") directly adjacent to Richfield Ventures' 'Blackwater' Bulk Gold Target in central British Columbia. Terms of the property acquisition required a cash payment of \$80,000 (paid) and the issuance of 150,000 common shares (issued). The Company paid the required cash portion of the purchase price by reaching an agreement with the vendor to apply the \$80,000 in field costs previously paid against the purchase price.

On January 13, 2010, the Company staked an additional 19 new mineral claims comprising 8,224 hectares contiguous to the 13 Auro claims acquired on January 12, 2010. For ease of reference, these contiguous claims are referred to as the "Auro Property – Central".

Auro Property – South

In April 2010, the Company staked an additional 17 mineral claims comprised of 7,886 hectares that are non contiguous to the Auro Property – Central claims. These 17 additional claims are located approximately 18 kilometres south east of the above 32 claims. For ease of reference, these non contiguous claims are referred to as the "Auro Property – South".

As a consequence of the January 2010 acquisition and subsequent staking of additional claims, the Company owned a 100% interest in 49 claims in the Auro Property comprised 21,912 hectares. In August 2010, the Company amalgamated 32 of the 49 claims into 1 claim resulting in the Company now owning 18 claims with an unchanged total of 21,912 hectares.

Auro Property – North West

In early January 2011, the Company increased its land position at the Auro Property by entering into a purchase agreement to acquire a 100% interest in the 407 hectare Princess Claim from Tom Christianson for \$8,000 cash and 40,000 shares at an ascribed price of \$0.52 per common share.

The Princess claim are located in the northwestern corner of the Auro property and is surrounded by the Company's Auro claims, which are adjacent to Richfield Ventures (RVC: TSX-V) bulk gold discovery.

GOLD REACH RESOURCES LTD.
Management's Discussion and Analysis
For the Three Months Ended June 30, 2011

Acquisition, Exploration and Development Costs - During the three months ended June 30, 2011 the Company incurred the following resource property costs:

(a) Mineral Property Costs for the Three Months Ended June 30, 2011

	Seel	Ox Lake	Auro	Total
Property acquisition costs				
Balance, beginning of the period	\$ 325,750	\$ 280,000	\$ 165,964	\$ 771,714
Cash	-	-	-	-
Shares	-	-	-	-

GOLD REACH RESOURCES LTD.
Management's Discussion and Analysis
For the Three Months Ended June 30, 2011

FINANCIAL CONDITION, RESULTS OF OPERATIONS AND CASH FLOWS

The Company's working capital deficiency as at June 30, 2011 was \$2,577 (2010 surplus – \$469,374). Administrative expenditures for the three months ended June 30, 2011 were \$202,663 (2010 – \$234,710). These costs reflect a modest reduction from the comparative period last year. Investor relations expense was higher in the current quarter. Management and administration costs, professional fees and stock based compensation were all lower in the current quarter ended June 30, 2011.

Expenditures on the mineral projects was \$628,245 compared to \$142,000 in the comparative period. Cash flow from financing activities for the three months ended June 30, 2011 was \$127,500 (2010 – \$1,012,500) reflecting proceeds from the issuance of shares.

Selected Quarterly Information

The following table provides selected financial information of the Company for each of the last eight quarters:

Basis of presentation	2011		2010				2009	
	IFRS	IFRS	GAAP	GAAP	IFRS	IFRS	GAAP	GAAP
Quarter ended:	June 30	March 31	Dec. 31	Sept. 30	June 30	March 31	Dec. 31	Sept. 30
(Loss)	\$(200,076)	\$224,845	\$(117,671)	\$(141,998)	\$(239,123)	\$(403,149)	\$(66,000)	\$(89,082)
(Loss) per share: basic and diluted	(\$0.01)	\$0.02	(\$0.01)	(\$0.01)	(\$0.02)	(\$0.14)	(\$0.02)	(\$0.03)
Weighted average of shares issued	15,576,545	14,509,148	11,797,011	10,921,008	10,554,022	4,409,769	3,432,088	3,307,130

Long-Term Liabilities	\$Nil							

Liquidity and Capital Resources

As an exploration stage company, the Company's liquidity position decreases as expenses are incurred. To mitigate this liquidity risk, the Company budgets both exploration and administrative expenditures and closely monitors its liquidity position. The Company's cash position as at June 30, 2011 was \$762,780 compared to March 31, 2011 it was \$1,607,572. The Company intends, if possible, to raise further financing by way of an equity issuance or private loans in order to meet its exploration and working capital requirements as and when needed.

GOLD REACH RESOURCES LTD.
Management's Discussion and Analysis
For the Three Months Ended June 30, 2011

During the three months ended June 30, 2011 issued 270,000 shares and 10,000 shares pursuant to the exercise of share purchase warrants and stock options, respectively, for net proceeds of \$127,500 compared to 50,000 shares issued in the comparative period in fiscal 2010 pursuant to the exercise of stock options and 2,000,000 flow-through shares for net proceeds of \$1,012,500.

FINANCIAL INSTRUMENTS

Foreign Exchange Risk

Foreign exchange risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign exchange rates. As at June 30, 2011, the Company holds no foreign currencies and is not exposed to any currency risk arising from fluctuation in foreign exchange rates.

Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company's cash and receivables are exposed to credit risk. Given the minimal amounts of these instruments, the Company is not exposed to any significant credit risk as at June 30, 2011.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Included in the loss for the period in the financial statements is interest income on Canadian dollar cash. As at June 30, 2011, the Company is not exposed to any significant interest rate risk.

Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liability. The Company manages liquidity risk by maintaining sufficient cash balances to enable settlement of transactions on the due date. Accounts payable and accrued liabilities are current. The Company addresses its liquidity through equity financing obtained through the sale of common shares and the exercise of warrants and options. Additional capital was successfully obtained during the year to increase liquidity.

SHARE DATA

As of September 23, 2011, the Company had 18,933,070 common shares issued and outstanding, 1,889,473 options issued and outstanding, 12,384,553 share purchase warrants issued and outstanding and 141,564 agent share purchase warrants issued and outstanding (fully diluted – 33,348,660).

RELATED PARTY TRANSACTIONS

- (a) During the three months ended June 30, 2011 management and director fees of \$36,000 (2010: \$58,500) were paid to directors or officers of the Company or to companies controlled by directors or officers of the Company.
- (b) During the three months ended June 30, 2011, mineral property consulting fees of \$20,692 (2010: \$Nil) were paid to directors or officers of the Company or to companies controlled by directors or officers of the Company.

GOLD REACH RESOURCES LTD.
Management's Discussion and Analysis
For the Three Months Ended June 30, 2011

- (c) Included in accounts payable and accrued liabilities as at June 30, 2011 is \$Nil (2010: \$23,609) owing to two directors of the Company for unpaid management fees.
- (d) Due to related party at March 31, 2011 of \$86,756 (2010: \$128,052) is payable to a company with directors in common. The amount owed is in the form of a promissory note that is unsecured, bears interest at the rate of 12% per annum, and is payable on demand. Included in the due to related party is accrued interest of \$51,756 of which \$1,047 was accrued for the three months ended June 30, 2011.

The above transactions, occurring in the normal course of operations, are measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

OFF-BALANCE SHEET ARRANGEMENTS

The Company does not have any off-balance sheet arrangements and does not contemplate such arrangements in the foreseeable future. There are no contingent liabilities.

CHANGES TO ACCOUNTING POLICIES

International Financial Reporting Standards

The Canadian Accounting Standards Board has confirmed that International Financial Reporting Standards ("IFRS") will replace Canada's current generally accepted accounting principles ("GAAP") for publicly accountable profit-orientated enterprises for interim and annual financial statements commencing after January 1, 2011. The Company's year end is March 31 of each year. The first year of reporting for the Company using IFRS will be for the fiscal 2012 year commencing April 1, 2011 and ending on March 31, 2012.

Accordingly, the Company has prepared its financial statements for fiscal 2012, the year ending March 31, 2012 using IFRS with comparatives for fiscal 2011, using IFRS.

The Company has completed its IFRS transition date compilation and has included that reconciliation to Canadian GAAP in the consolidated financial statements for the three months ended June 30, 2011.

For detailed review of the IFRS first time adoption and reconciliations to Canadian GAAP for the applicable periods, reference is made to Notes 14 and 15 of the consolidated financial statements for the three months ended June 30, 2011.

DISCLOSURE CONTROLS AND PROCEDURES

In connection with National Instrument 52-109 (Certificate of Disclosure in Issuer's Annual and Interim Filings) ("NI 52-109") the Chief Executive Officer and Chief Financial Officer of the Company have filed a Venture Issuer Basic Certificate with respect to the financial information contained in the quarterly unaudited consolidated financial statements and this accompanying Quarterly MD&A (together the "Quarterly Filings").

In contrast to the full certificate under NI 52-109, the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109. For further information the reader should

GOLD REACH RESOURCES LTD.
Management's Discussion and Analysis
For the Three Months Ended June 30, 2011

refer to the Venture Issuer Basic Certificates filed by the Company with the Quarterly Filings on SEDAR at www.sedar.com.

DISCLOSURE FOR VENTURE ISSUERS WITHOUT SIGNIFICANT REVENUE

Consistent with other junior companies in the mineral exploration industry, the Company has no source of operating revenue. The Company's unaudited consolidated financial statements for the three months ended June 30, 2011 provide a breakdown of the general and administrative expenses for the quarter under review and an analysis of the capitalized and expensed exploration and development costs incurred on its mineral properties.

FORWARD-LOOKING INFORMATION

This MD&A contains certain forward-looking statements and information relating to the Company that is based on the beliefs of its management as well as assumptions made by and information currently available to the Company. When used in this document, the words "anticipate", "believe", "estimate", "expect" and similar expressions, as they relate to the Company or its management, are intended to identify forward-looking statements. This MD&A contains forward-looking statements relating to, amongst other things, regulatory compliance, the sufficiency of current working capital, the estimated cost and availability of funding for the continued exploration of the Company's properties. Such statements reflect the current views of the Company with respect to future events and are subject to certain risks, uncertainties, and assumptions. Many factors could cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. Aside from factors identified in the annual MD&A, additional, important factors, if any, are identified here.

RISKS AND UNCERTAINTIES

Early Stage – Need for Additional Funds

Gold Reach has no history of profitable operations and its present business is at an early stage. As such, Gold Reach is subject to many risks common to such enterprises, including undercapitalization, cash shortages and limitations with respect to personnel, financial and other resources and the lack of revenues. There is no assurance that Gold Reach will be successful in achieving a return on shareholders' investments and the likelihood of success must be considered in light of its early stage of operations.

Gold Reach has no source of operating cash flow and no assurance that additional funding will be available to it for further exploration and development of its projects when required. Although Gold Reach has been successful in the past in obtaining financing through the sale of equity securities or joint ventures, there can be no assurance that Gold Reach will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in the delay or indefinite postponement of further exploration and development of its properties.

Exploration and Development

Exploration for minerals or precious gems is a speculative venture involving substantial risk. There is no certainty that the expenditures made by the Company and/or its Subsidiaries will result in discoveries of commercial metal reserves.

GOLD REACH RESOURCES LTD.
Management's Discussion and Analysis
For the Three Months Ended June 30, 2011

Mining and development risk always accompany anticipated rewards, and uncertainties always exist where mineral properties are concerned. Uncertainties include the size, grade and recovery of a natural occurring mineral deposit. Although exploration and development efforts can outline a mineral deposit with a degree of certainty, ultimate grade and tonnages are never fully known until mining has been completed.

Metal and prices are also a significant factor in the development decision for a mineral property, as a mine may not be economically feasible in a period of depressed prices. Factors, beyond the control of the Company may affect the marketability of any minerals discovered. Pricing is affected by numerous factors such as international economic and political trends, global or regional consumption and demand patterns, and increased production by current producers.

Operating Hazards and Risks

Mining operations involve many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. In the course of exploration, development and production of mineral properties, certain risks, and in particular, unexpected or unusual geological operating conditions including rock bursts, cave-ins, fires, flooding and earthquakes may occur. Operations in which Gold Reach has a direct or indirect interest will be subject to all the hazards and risks normally incidental to exploration, development and production metals, any of which could result in damage to or destruction of mines and other producing facilities, damage to life and property, environmental damage and possible legal liability for any or all damage.

Title Risks

Although Gold Reach has exercised the usual due diligence with respect to determining title to properties in which it has a material interest, there is no guarantee that title to such properties will not be challenged or impugned.

Environmental Regulations, Permits and Licences

Gold Reach's operations are subject to various laws and regulations governing the protection of the environment, exploration, development, production, taxes, labour standards, occupational health, waste disposal, safety and other matters. Environmental legislation provides for restrictions and prohibitions on spills, releases or emissions of various substances produced in association with certain mining industry operations, such as seepage from tailings disposal areas, which would result in environmental pollution. A breach of such legislation may result in impositions of fines and penalties. In addition, certain types of operations require the submission and approval of environmental impact assessments. Environmental legislation is evolving in a direction of stricter standards, and enforcement, and higher fines and penalties for non-responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has the potential to reduce the profitability for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has the potential to reduce the profitability of operations. Gold Reach intends to fully comply with all environmental regulations.

Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations and, in particular, environmental laws.

GOLD REACH RESOURCES LTD.
Management's Discussion and Analysis
For the Three Months Ended June 30, 2011

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact of Gold Reach and cause increases in capital expenditures or productions costs or reduction in levels of productions at producing properties or requirements abandonment or delays in development of new mining properties.

Competition and Agreements with Other Parties

The mining industry is intensely competitive in all its phases. Gold Reach competes with other companies that have greater financial resources and technical capacity. Competition could adversely affect the Company's ability to acquire suitable properties or prospects in the future.

Gold Reach may, in the future, be unable to meet its share costs incurred under agreements to which it is a party and it may have its interest in the properties subject to such agreements reduced as a result. Also, if other parties to such agreements do not meet their share of such costs, Gold Reach may not be able to finance the expenditures required to complete recommended programs.

Price Volatility of Public Stock

In recent years securities markets have experienced extremes in price and volume volatility. The market price of securities of many early stage companies, among others, have experienced fluctuations in price which may not necessarily be related to the operating performance, underlying asset values or prospects of such companies. It may be anticipated that any market for Gold Reach's shares will be subject to market trends generally and the value of Gold Reach's shares on the TSX Venture Exchange may be affected by such volatility.

Economic Conditions

Unfavourable economic conditions may negatively impact Gold Reach's financial viability as a result of increased financing costs and limited access to capital markets.

Dependence on Management

Gold Reach is very dependent upon the personal efforts and commitment of its existing management. To the extent that management's services would be unavailable for any reason, a disruption to the operations of the Company could result, and other persons would be required to manage and operate Gold Reach.

CONFLICTS OF INTEREST

Gold Reach's directors and officers may serve as directors and officers, or may be associated with other reporting companies or have significant shareholding in other public companies. To the extent that such other companies may participate in business or asset acquisitions, dispositions, or ventures in which Gold Reach may participate, the directors and officers of Gold Reach may have a conflict of interest in negotiating and concluding terms respecting the transaction. If a conflict of interest arises, Gold Reach will follow the provisions of the Business Corporations Act ("Corporations Act") in dealing with conflicts of interest. These provisions state that where a director/officer has such a conflict, the director must arrange a meeting of the board to disclose his interest and must refrain from voting on the matter unless otherwise permitted by the Corporations Act. In accordance with the laws of the Province of British Columbia, the directors and officers of Gold Reach are required to act honestly, in good faith and in the best interests of Gold Reach.
